Status Report Q1 2019

June 2019

**Rebuilding
Ireland**

Rebuilding Ireland - Action Plan for Housing and Homelessness

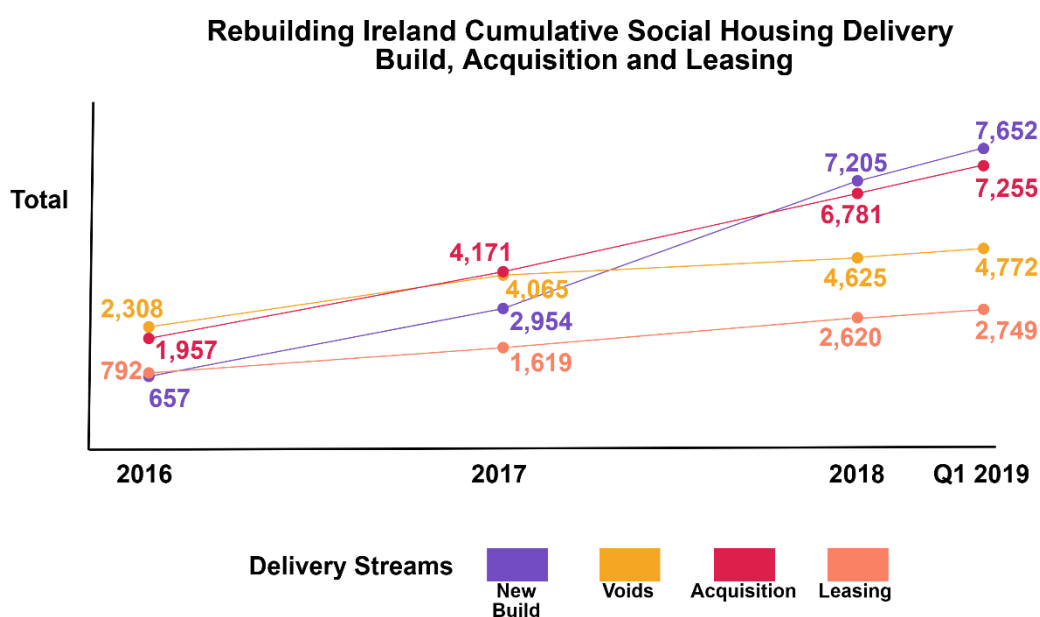

Quarter 1 of 2019: Social Housing Construction Status Report

1. Rebuilding Ireland: Social Housing Targets

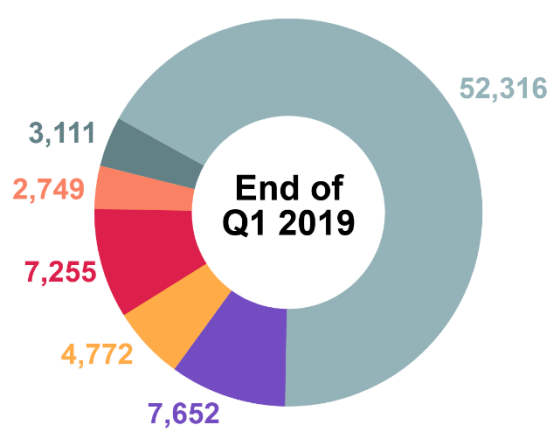

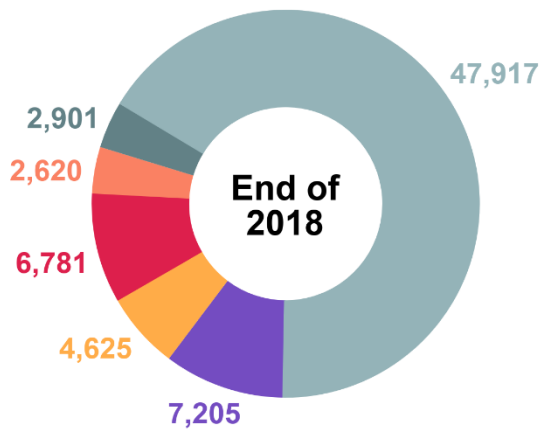

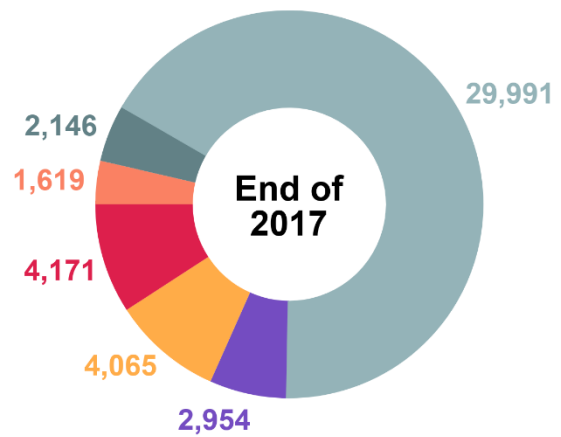

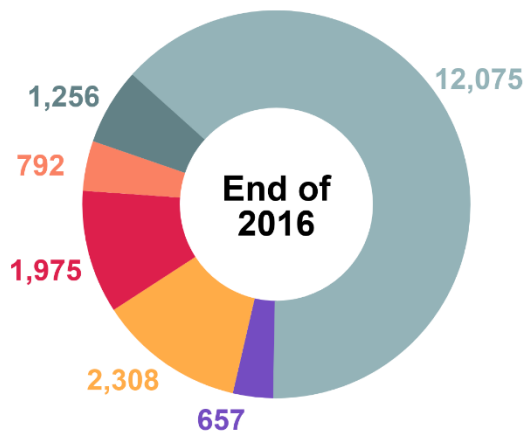

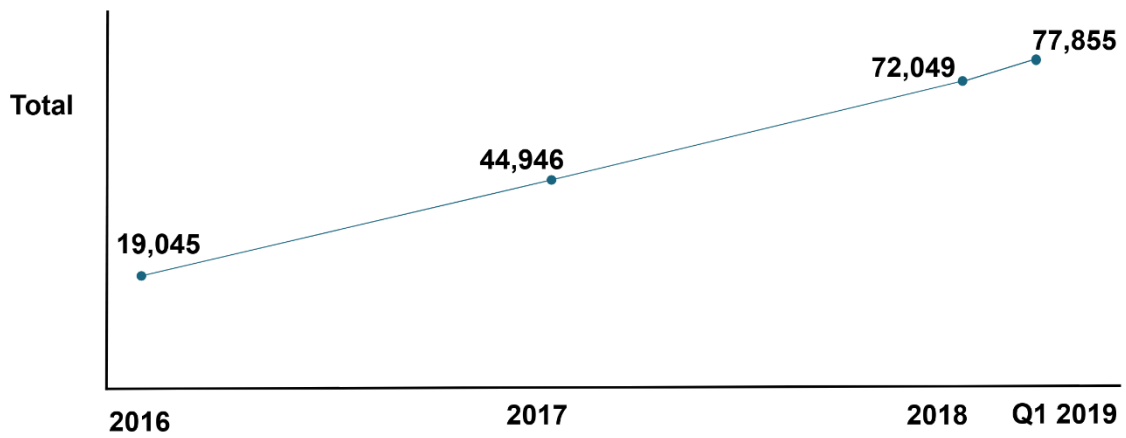

Under Rebuilding Ireland, the Government has committed more than €6 billion to support the accelerated delivery of over 138,000 additional social housing units to be delivered by end 2021. This will include 83,760 HAP units, 3,800 RAS units and over 50,000 new homes, to be delivered, broken down as follows (these targets were increased following Budget 2019 as additional funding was secured):

- Build: 33,617
- Acquisition: 6,830
- Leasing: 10,036

It should be noted that, in the context of the review of Rebuilding Ireland and the refocussing of the social housing delivery programme to direct build, the number of newly constructed and built homes to be delivered by 2021 has increased significantly with overall delivery increasing from 47,000 new homes to over 50,000. This has also resulted in the rebalancing of delivery under the construction programme from 26,000 to 33,617 with acquisition targets moving from 11,000 to 6,830.

Progress in advancing the Construction Agenda

The *Quarter 1 – 2019 Social Housing Construction Projects Status Report* has now been finalised and the attached Appendices set out progress made to date in advancing the construction pipeline.

Appendix 1 sets out the current status of schemes, as of the end of Q1 2019.

In 2018, 4,251 new build social housing homes were delivered; a very significant 85% increase on the 2,297 new builds in 2017. The target for 2019 is substantially increased further, to over 6,200 homes. With this in mind, ambitious targets for this year have been set for each local authority, details of which are available on the Rebuilding Ireland website at: <http://rebuildingireland.ie/news/social-housing-targets-2019/>.

In Quarter 1 of 2019, 443 new build homes were delivered, with a further 147 vacant local authority dwellings in various states of significant disrepair brought back to productive use through the Voids Programme.

In all, some 479 additional homes were provided by LAs and AHBs under the various acquisition programmes with a particular focus on areas of the country where Acquisition of vacant properties represents the most expedient and cost efficient mechanism of delivering new homes for families. A further 130 homes were realised via the Leasing programme.

Families and individuals in the private rented sector were also supported through the Housing Assistance Payment and schemes such as RAS. Over 4,000 households (4,399) were supported by HAP in the first quarter of 2019.

Overall, almost 6,000 (5,808) in the first three months of 2019, over 21% of the ambitious target for the year, with progressively increased output expected throughout the remainder of the year as developments in the pipeline materialise.

Appendix 2 sets out the various funding programmes delivering the 20,324 homes now in the pipeline. Over 10,229 homes, across 768 schemes/phases of schemes are advancing homes through the LA led Social Housing Investment Programme (SHCIP), which is significant progress on the pipeline shown in previous reports.

The Approved Housing Body led Capital Advance and Leasing Facility (CALF) is a substantial contributor to the pipeline with 432 schemes/phase of the same scheme now in place delivering over 6,580 homes,

similarly showing significant progress on the previous pipeline. The Report includes a small number of CALF Part Vs which are being delivered as part of larger turn-key projects.

The remaining schemes are being delivered through the Capital Assistance Scheme (1,431 homes) and the Regeneration programme (1,085 homes).

Some schemes, mainly turnkey situations, are being advanced in phases, so the scheme may have a number of different phases which represents a periodic hand over of the new homes.

PPPs are also reflected in the Construction Status Report with the addition of Bundle 1 and 2 - 999 units, across 14 schemes and 10 Local Authorities. A further PPP bundle will be added when it reaches the appropriate approval stage.

It should be noted that the Social Housing Construction Status Report does not reflect the totality of the overall Build Programme. In addition to the homes reflected in the Report, local authority Part Vs are being delivered and these are reflected in the overall statistics provided by the Department.

An explanation of the delivery categories and Stages is provided at **Appendix 3**.

Appendix 3- Explanatory notes

The Construction Status report is a full compendium of live LA and AHB new-build activity across the period 2016-2021. The following schemes are represented in the Construction Status Report:

- Social housing Capital Investment Programme (SHCIP)
- Capital Assistance Scheme (CAS)
- Capital Advance Leasing Facility (CALF)
- Public Private Partnership (PPP)

Schemes which have completed in prior reporting periods are retained on the Report, so as to preserve data and provide a full overview of activity.

The Report is published every quarter in open format on the data.gov.ie website, which allows the user to filter and analyse data.

The Social Housing Capital Investment Programme (SHCIP) provides funding to local authorities for the provision of social housing by means of construction and acquisition.

The Capital Assistance Scheme provides essential funding to AHBs for the provision of accommodation for persons with specific categories of housing need such as Homeless and Older Persons, People with Disabilities, Returning Emigrants and Victims of Domestic Violence.

4-Stage Approval Process

The funding approval process for social housing projects supported by the Department under the SHCIP and CAS schemes outlined above is in line with the Government's Capital Works Management Framework (CWMF), the same approach used for other publicly-funded Capital construction projects. While there are nine points of review within the CWMF, the Department has combined these to just four for capital-funded social housing construction projects.

The Departmental approvals themselves represent a small minority only of the time taken in advancing a build project onto site. The approach we follow means that local authorities forward design proposals and costings to the Department sequentially, as the local authorities advance the projects through their own planning work. Check lists, guidance and templates have been issued to the Local Authorities to assist them in this process.

What are the 4 stages?

The four stages are as follows:-

Stage 1 – Capital Appraisal to verify the business case and basic project suitability – this is a light presentation of information; no design and only indicative costs are required at this initial stage.

Stage 2 –Pre-planning outline design and cost check –following site investigations, this involves the level of designs that are required for the Part 8 planning process and a completed QS cost plan; detailed tender drawings and resulting costs are not needed at this stage until planning permission is obtained.

Stage 3 – Pre-tender costs check – the more detailed designs and cost estimates have been prepared by the local authority design team at this stage and a cost check submitted before going to tender, but if

costs are consistent with the earlier stages, then this review will be swift. Unless there have been changes to the design following Part 8/planning, or conditions to be met, the design is not reviewed.

Stage 4 – Tender approval from Department – the tenders have been received and assessed by the local authority and again, if costs are consistent with the earlier stages, this review will be swift.

There is now a Target Programme for advancing social housing capital-funded projects through design, planning and approval. This overall programme sets a target of 59 weeks from stage 1 submission by the local authority, to contract award for the construction. It establishes target turnaround times for the Department to carry out the review process and for the local authority to carry out the design of the scheme, the planning process and the procurement of a builder. While the aim of the programme is to create a realistic but ambitious target programme, it is acknowledged that external factors can affect construction projects; for example, delays can arise at planning, where the views of Councillors and communities are taken into account, but these can be minimised by early engagement. Site condition difficulties should not arise if appropriate site investigations are carried out at the beginning of the process.

The single-stage approval process

A revised single-stage approval process for social housing projects less than €2m has been implemented. The main change from the previous single-stage approach is that in the event that the approved budget is not maintained, a second application for a budget revision will be facilitated on receipt of tenders. This will be facilitated where certain circumstances have caused the costs to rise – for example, tender inflation - and where such an adjustment will not increase the overall budget requirement beyond the €2m level.

Capital Advance Leasing Facility (CALF):

The Department offers financial support to Approved Housing Bodies (AHBs) in the form of a long term loan under the **Capital Advance Leasing Facility (CALF)** to assist with the financing of the **construction** or **acquisition** of units that will be provided for social housing use. This loan facility can support up to 30% of the eligible capital cost of the project, where the units will be provided under long-term lease arrangements to local authorities for social housing use. Funding is provided to AHBs through Local Authorities.

CALF approvals do not follow the same approval process as the SHCIP 4-Stage process. The assessment process includes a full financial evaluation which is carried out in conjunction with the Housing Agency. The funding approval may be provided at various stages of project development, including pre-planning for example, in which case the funding approval will be subject to planning. Where a project changes post-approval, a revised application is submitted and a revised approval issues following normal assessment procedures.

Public Private Partnership (PPP):

€300 million was committed in Budget 2015 to providing 1,500 new social housing units via the Public Private Partnership model. The programme is being delivered in three bundles with a capital value of approximately €100 million each. Each bundle is being developed over a number of sites, spread across different local authorities. Each individual site is to provide between 50 and 100 social housing units.

The housing units are delivered using what is termed as an 'availability-based PPP model'. A private sector company designs, builds, finances and maintains the social housing units. In return, it receives payments which are spread over 25 years.

As the model is 'availability-based', the private sector partner is responsible for ensuring that units are available for occupation. The local authority is responsible for allocating tenants. The private sector partner provides maintenance and upkeep services for 25 years. After this time, the units are returned to the State in good condition, subject to reasonable wear and tear.

Bundles are added to the Construction Status Report at tender stage.

Part V data on the CSR:

The Construction Status Report does not contain data on Part V schemes funded under the SHCIP scheme or delivered by LAs without DHPLG funding. It does contain a small number of AHB Part Vs which are advancing as part of larger schemes approved under the Capital Advance Leasing Facility. The full Part V output is published as part of the overall Social Housing Delivery Report.

Disclaimer:

While every effort is made to ensure that the data in the report is accurate at the time of publication, the report now covers 20,324 units across over 1,416 schemes/phases of schemes and is reliant on the provision and processing of scheme updates and delivery data from 31 Local Authorities. Where errors arise, these will be corrected in the next version published. The most recent published version therefore should always be referred to.
